SUMMARY

Junior Frontend Developer based in France, specialized in React and modern frontend architecture. Built and deployed portfolio projects including a feature-based e-commerce application structured around reusable components, domain modeling, and separation of concerns. Strong background in mathematics and analytical problem-solving, with a growing focus on building scalable, maintainable web applications in collaborative environments.

PROJECTS EXPERIENCE

- **Shopping Cart Application |** React, JavaScript, CSS, React Router, Vercel **|** Github repo **|** Live Demo
  - Developed a full frontend e-commerce workflow: product catalog, cart, checkout, and confirmation pages
  - Applied software design principles to keep business logic independent from React components
  - Organized the project using a scalable feature-based structure inspired by Clean Architecture and Domain-Driven Design
  - Improved maintainability by separating presentation, application workflows, and persistence concerns
- **CV Builder Web Application** | React, JavaScript, CSS, React Router, Netlify | Github repo | Live Demo
  - Designed and developed a dynamic CV builder allowing users to create and edit structured resumes.
  - Implemented reusable React components and state-driven UI architecture.
  - Built live preview functionality and user input validation for improved UX.
  - Deployed production-ready application on Netlify.
  - Integrated modular component design to support future template expansion.
